Apply Now

We are looking for an outstanding Web Developer to be responsible for the coding, innovative design and layout of our website. Web developer responsibilities include building our website from concept all the way to completion from the bottom up, fashioning everything from the home page to site layout and function.

Responsibilities will span both the implementation of new projects as well as the maintenance and support of existing projects or applications. This role will report to the Director of Technology and collaborate cross functionally with other members of the team (marketing, design, content development, operations, IT, etc). IC Realtime has several web sites, ecommerce stores, cloud applications, and so much more. Come help build the next great thing, and maintain an excellent history of web code and applications. Desired requirements and qualifications include but are not limited to:

Responsibilities

- Write well designed, testable, efficient code by using best software development practices
- Create website layout/user interface by using standard HTML/CSS practices, frameworks like LESS and SASS/CSS3
- Integrate data from various back-end services and databases
- Gather and refine specifications and requirements based on technical needs
- Create and maintain software documentation
- Be responsible for maintaining, expanding, and scaling our site
- Stay plugged into emerging technologies/industry trends and apply them into operations and activities
- Cooperate with web designers to match visual design intent
- Responsive Design, Bourbon, Twitter Bootstrap

- Collaborate with designers and team leads to convert Adobe XD designs to web layouts

- Use of version control systems, specifically Git and GitHub

- 2+ years of experience using modern, open source software to prototype and deploy backend web applications, including all aspects of server-side processing, data storage, and integration with frontend development.

- Quickly researching and learning new programming tools and techniques

- Experience working with a cloud platform (AWS)

- Familiarity working with e-commerce platforms and/or ERP systems

What our dream candidate has:

- ==A burning desire for NodeJS and all things web (HTML, CSS, and frameworks)==

- API Development (Restful, GraphQL)

- API Familiarity (Stripe, NetSuite, ZenDesk)

- ==Front End Experience (React, Bootstrap)==

- Experience with AWS

- Desire and creativity to develop and implement simple web pages and robust applications alike

- Courage to handle and maintain existing PHP applications

Skills

- ==Proven working experience in web programming==
- ==Top-notch programming skills and in-depth knowledge of modern HTML/CSS==
- ==Familiarity with at least one of the following programming languages: PHP, ASP.NET, Javascript==

Javascript, Javascript frameworks, Bootstrap, JQuery, WebGL

Knowledge and experience of deploying in multiple web servers (nginx, Apache, Tomcat, etc)

==Knowledge or experience front end framework such (ReactJS Preferred)==

Experience working with open source RDMBS technologies (e.g., PostgreSQL, MySQL)

Authoring developer-friendly documentation (e.g., API documentation, deployment operations)

Comfort in working with PHP applications

Working knowledge of linux

Fluid with Source Code Management (git)

- A solid understanding of how web applications work including security, session management, and best development practices
- Adequate knowledge of relational database systems, Object Oriented Programming and web application development
- Hands-on experience with network diagnostics, network analytics tools
- Basic knowledge of Search Engine Optimization process
- Aggressive problem diagnosis and creative problem solving skills
- Strong organizational skills to juggle multiple tasks within the constraints of timelines
- Ability to work and thrive in a fast-paced environment, learn rapidly and master diverse web technologies and techniques.
- BS in computer science or a related field
